The Yalgoo Iron Project - Outline

Ferrowest Limited is developing the Yalgoo Iron Project aimed at producing seaborne traded merchant pig iron (96%Fe) from the Yogi magnetite deposit near Yalgoo in the mid west region of Western Australia. Proposed initial production is 1,000,000 tonnes per annum. The plan to process the iron ore to pig iron is premised on the ITmk3[®] technology and excellent existing infrastructure servicing the Project area. The resulting value added merchant pig iron product will be a relatively high margin, high quality, low volume product for export to quality electric arc furnace steel making plants worldwide.

The Western Haematite Prospect – Outline

Ferrowest Limited has identified a potential zone of direct shipping ore ("DSO") grade haematite at its Yogi iron ore deposit 14 km east of Yalgoo in the mid west of Western Australia. The prospect is to the west of the main magnetite ore body that forms the basis of the Yalgoo Iron Project. With a surface expression of 2km in length and with varying widths up to 50m wide it has significant potential as a DSO project. Surface rock chip sampling along the Western Haematite Prospect produced an average grade of 57-58% Fe.
